Two-Way Talking Touch Screen

60-924-RF-TS

OVERVIEW

The Simon *XT*™ Two-Way Talking Touch Screen is a color LCD screen featuring a user-friendly interface that compliments Simon XTi and Simon *XT* security systems for safety and peace of mind. In addition, optional wireless devices can be added to provide control over other functions including Z-Wave® wireless lighting control devices, Z-Wave wireless thermostats for home HVAC systems, and Z-Wave door lock control. This touch screen is the ideal solution for providing additional points of control throughout the home. Up to four touch screens can be installed in one home for maximum convenience.

The touch screen's interface has been carefully designed to provide home status information at a glance that is intuitive and easy to use. The wireless device installs quickly with minimal disruption and works seamlessly with optional Alarm.com Web portal and mobile applications. These applications can provide additional lifestyle-enhancing information such as the current outdoor temperature and a four-day weather forecast.

STANDARD FEATURES

- 3.5-inch color LCD screen with Graphical User Interface (GUI) delivers at-a-glance status of home and property
- Wireless design facilitates quick and easy installation
- Compatible with Simon XTi and Simon *XT* for added control of security system features
