

ADCH10

ENVIRONMENTAL CAMERA HOUSING

The ADCH10 is a high quality environmental housing designed for most CCD cameras and zoom lenses. This polycarbonate housing provides excellent protection for the installed camera. The 180° opening of the cover provides full and easy access to the camera and lens for trouble-free installation and servicing.

The camera platform can be securely attached in any position along the full length of the housing. This platform is constructed of a rigid non-conductive material which helps to eliminate common grounding problems.

In cold weather climates, or where condensation problems exist, the optional low current heater and blower automatically regulate heat in the housing to maintain a clear viewing window.

FEATURES

- Indoor/outdoor housing
- Space - efficient design accepts most cameras and lenses
- Cover opens 180° for easy camera access
- Tough, high-impact polymer construction
- IP4/NEMA-3R protection
- Automatic regulating heater available
- 24 VAC blower, optional
- 24 VAC heater, optional
- Tamper resistant
- Electrically isolated camera platform
- Multiple cable pass mounts available
