

Versatile, Virtually Indestructible and Ready for the Extreme

Not just a camera enclosure but a engineered outdoor housing system that is designed to expand all indoor camera models into complete rugged outdoor system solutions.

Virtually Indestructible: We produce the worlds toughest enclosures, will not corrode, rust, leak and has proven to withstand a whole world of abuse.

No matter the climate we take outdoor temperature protection very serious: Extreme Hot climates, Cold climates, Marine and everywhere in between.

innovative

ST-HB-MVP : Dotworkz S-Type Heater & Blower Camera Enclosure

Description:

The S-Type outdoor camera protection system is designed for all brands of traditional "brick" or static cameras.

The S-Type housing utilizes all the features of our popular D-Series products into a complete airt/water tight system solution for today's sensitive CCTV, megapixel, HDTV or other long body cameras with room for wireless radios, cellular routers, encoders and small form NVR devices.

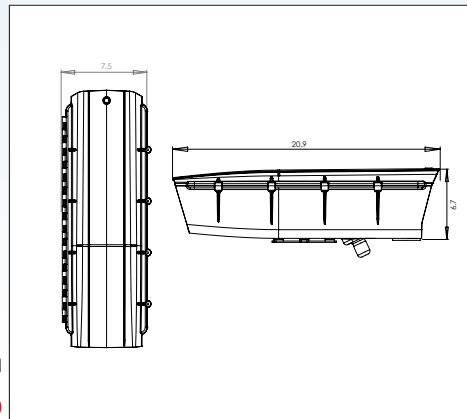

Features:

- IP and analog Fixed camera compatible
- Designed to protect sensitive HD or megapixel
- Thermostatically controlled Heater Blower System
- IP67 level protection for extreme marine, dust,insect, and other conditions
- Internal mounting space for: routers, cell networks, hard drives, UPS, WiMAX, mesh hardware, etc
- Virtually indestructible, Heavy duty, Non Metallic, Non corrosive, flame resistant, Vandal tough Polycarbonate Thermal Plastic alloy
- Lockable cover system

Specs:

Operating Temperature (Absolute):
-40° to 140°F (-40°C to 60°C)
Operating Temperature (Reccomended):
0° to 120°F (-17°C to 49°C)
Power Consumption:
2 amps @ 115 VAC typical at full load
Input Power Source options for MVP:
24VAC, 110 VAC, or 220 VAC
Outputs for Camera Power for MVP:
IP: 12VDC, 24VDC / AC (CCTV): 12VAC, 24VAC
Internal Power Available for Camera:
4 amps @ 12 VDC on typical model
Shipping: 24" x 10" x 10" - 11 lbs (5 Kg)
