

Versatile, Virtually Indestructible and Ready for the Extreme

Not just a camera enclosure but a engineered outdoor housing system that is designed to expand all indoor camera models into complete rugged outdoor system solutions.

Virtually Indestructible: We produce the worlds toughest enclosures, will not corrode, rust, leak and has proven to withstand a whole world of abuse.

No matter the climate we take outdoor temperature protection very serious: Extreme Hot climates, Cold climates, Marine and everywhere in between.

- Universal input voltages option 220 VAC, 110 VAC and 24 VAC/VDC
- 24 VDC / 12 VDC camera and component power
- Easier, faster installation process - less time
- Works with all cameras brands and models*

innovative

D2-TR-MVP : Dotworkz D2 Tornado Camera Enclosure

Description:

The D2 Tornado provides needed air flow circulation around the enclosed camera and sensitive hardware, significantly reducing hotspot buildup when temperatures heat up. The D2 Tornado is ideal for milder climates where temperature extremes are rare but thermal protection is required.

The Tornado delivers 20 CFM (Cubic Feet per Minute) air movement at a max of 4 watts.

Specs:

Operating Temperature (Absolute):

-20° to 140° F (-29° C to 60° C)

Operating Temperature (Recommended):

30° to 120° F (1° C to 49° C)

Power Consumption:

2 amps @ 115 VAC typical at full load

Input Power Source options for MVP:

24VAC, 110 VAC, or 220 VAC

Outputs for Camera Power for MVP:

IP: 12VDC, 24VDC / AC (CCTV): 12VAC, 24VAC

Internal Power Available for Camera:

4 amps @ 12 VDC on typical model

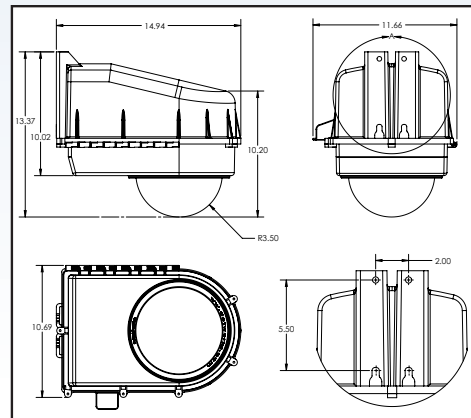

Shipping: 17" x 13" x 16" - 12 lbs (5.4 Kg)

Engineered and
Built
in the **US**

Features:

- IP and analog PTZ camera compatible
- Dual Blower generates 20 CFM high flow air movement
- Virtually indestructible Polycarbonate Thermal Plastic alloy
- Internal bracket included for perfect fit for PTZ, megapixel or mini domes
- Switchable upper and lower camera mounting locations for maximum versatility and internal storage space
- Internal mounting space for: routers, cell networks, hard drives, UPS, WiMAX, mesh hardware, etc
- IP66 rated against dust, water and salt water air & IP68 water proof connection ports
