**BOSCH**  
Invented for life

- ▶ 25 VRMS or 70 VRMS operation up to 8 W
- ▶ Listed at 15 cd, but providing 75 cd on axis
- ▶ Low average current draw
- ▶ Extra protection and improved audibility through sealed-back speaker construction and vandal-resistant grill
- ▶ Compatible with SM and DSM Synchronization Modules

The Wheelock ET80 Fixed-candela Speaker Strobes meet the critical needs of the life safety industry for voice and tone signaling. They have a vandal-resistant die-cast grill, a sealed-back speaker, and a Lexan lens for extra protection.

The high-efficiency speaker is designed for maximum output at a minimum wattage across a frequency range of 400 Hz to 4 kHz and covers both 25 V and 75 V audio systems with a series of wattage taps from 0.125 W to 8 W.

When used with the SM (single) or DSM (dual) Synchronization Modules, the strobe produces a synchronized strobe flash for compliance with ADA guidelines concerning photosensitive epilepsy. All strobe input is compatible with standard reverse polarity type supervision of circuit wiring by a fire alarm control panel (FACP).
