

RSS Strobes with Colored Lenses

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Choice of three strobe lens colors with range of intensity options
- ▶ Wall or ceiling mount on standard electrical boxes
- ▶ Operates from 16 V to 33 V at 1 flash/sec using filtered or full-wave rectified DC voltage
- ▶ Synchronize with DSM-12/24-R Synchronization Module

The Wheelock RSS Series Colored-lens Strobes are effective for alerting personnel in industrial, military, or government applications. They are ideal for mass notification systems and for emergency, warning, or trouble notification in many industrial operations. They are not listed for fire alarm use but are built with the same high-quality circuits and parts used in Wheelock's life safety strobes.

They are available in amber, blue, or green lens colors and include multi-candela models with four field-selectable settings, a high-candela (110 cd) model with two field-selectable settings, or a 110 cd high-candela model. They are designed for indoor use and can be either wall or ceiling mounted on standard electrical boxes.

Installation/configuration notes

Compatible Products

The following products are compatible with the RSS Series Strobes:

Category	Product ID	Product Description
Control Panels	D7024 ¹	Addressable FACP
	D7024	Conventional FACP
	D8024 ²	Analog FACP
	D9124 ²	Addressable FACP
	D10024A ²	Analog FACP
	FPD-7024 ¹	Addressable FACP
	FPD-7024	Conventional FACP
Modules	FPA-1000	Analog Addressable FACPs
	SM-12/24-R	Single synchronization module (red)
	DSM-12/24-R	Dual synchronization module (red)

¹ When used with a D7039 Multiplex Expansion Module, the FPD-7024 and D7024 become addressable fire alarm control panels (FACPs).

² For synchronization, use the DSM-12/24-R Synchronization Module with these control panels.

Mounting Considerations

Flush-mount these strobes on 4-inch square by 1-1/2-inch deep, single-gang, or double-gang electrical back boxes or surface-mount them on Wheelock's SHBB Back Box.

Wiring

Notice

Do not use these strobe units in coded or pulsed signaling circuits.

The input terminals accept wires with diameters between 18 AWG and 12 AWG (ISO 0.75 mm² and 4 mm²).
