Master(s) shall have built-in loud speaker with adjustable speaker volume. Master(s) shall have a built-in 3 Watt audio amplifier.

Contractor shall observe all local and national electrical and building codes.

Architects' And Engineers' Specifications

- PSDC24 Series 24VDC System Power Supply (1 required per system)

AA704 Console Master Station

The AA704 master station is designed for console mounting or wall mounting using a customer-supplied backbox. The keyboard assembly is made of UV-cured PVC, and is resistant to numerous fluids and chemicals. The keyboard is equipped with backlight and the light intensity can be adjusted with a variable resistor accessible from the front.

The master station is ideally suited as a "control desk station" in correctional institutions, prisons, police stations, marine environments, etc.

The station has an internal 3 Watt amplifier and the speaker volume is adjustable with switches located inside the station, for four levels of volume. In addition to the built-in loudspeaker, the unit is prepared for connection of an external speaker. As an optional feature, a 10 Watt power amplifier (model FC740) may be used with this station, for higher-power applications.

The AA704 offers a remote control output which can be used to drive external call indicators (lamp/buzzer) or for general remote control facility activated by the calling subscriber.

Features

- Clear two-way communications
- Resistant to numerous fluids and chemicals
- Flush or Surface Mounted (with customer's back box)
- Removable front for installation and service
- No Central Exchange Required
- All-Call (standard)
- Built-in speaker with adjustable speaker volume
- Remote control (optional)
- Simple loop wiring makes it simple to install
