

AP777 and AP777B Steel Adapter Plate (painted White)

AP777 Adapter Plate Shown

Architects' And Engineers' Specifications

The adapter plate(s) shall be Alpha Communications® Model **AP777** (or **AP777B**) or approved equal and shall be large enough to cover the area occupied by the previous intercom unit. The adapter plate shall be made of 22 gauge cold-rolled steel, painted in a White powder coat paint finish. The adapter plate(s) shall be punched to cover the existing back box, and for the apartment intercom (or videointercom) station to be mounted onto the adapter plate(s). If required, contractor shall paint the adapter plate(s) to match the existing wall finish.

Important Note

Since these adapter plates can be used with a variety of stations and devices, we cannot guarantee a color match between the stations and these adapter plates!

AP777 and AP777B Adapter Plates

The Alpha Communications® **AP777** and **AP777B** adapter plates are designed specifically to cover existing over-sized apartment intercom back boxes and other existing wall openings.

Once the adapter plate is affixed to the wall, you can install your **open-voice** or handset apartment intercom station or surface mount video-intercom station directly onto the adapter plate.

The model **AP777** features two (2) mounting holes 10.50" (267mm) on-center, top-to-bottom, to enable you to easily mount the plate over an existing 777 series flush back box. In addition, the model **AP777** also features a large (center) hole for wire access and four (4) pre-punched holes for mounting common apt. intercom stations and handsets.

Installation is quick, easy, attractive and eliminates the need for plastering and painting over the existing hole.

Model **AP777B** is the same as the **AP777**, except there are no mounting holes on the front of the faceplate. This enables you to punch or drill any special holes you may need, or to leave the faceplate totally blank.

Custom-sized adapter plates are also available in aluminum, stainless steel, polished brass, or other painted finishes. Please send a detailed sketch to our sales dept., along with the quantity needed, for a prompt quotation.

Features

- Heavy Duty 22 Gauge Cold-Rolled Steel Faceplate
- Easy Installation with pre-punched holes
- Decorator White Color
- High Quality Powder Coat Painted Finish
