

TTE33-3 AlphaEntry™/QwikBUS™ Panel Speaker/Microphone Unit

TTE33-3 (Shown with Housing)

Architects' And Engineers' Specifications

The AlphaEntry™ door entry panel speaker / microphone unit(s) shall be Alpha Communications®/S.T.R.™ model# TTE33-3 QwikBUS™ or equivalent. Speaker/microphone unit(s) shall be powered from the associated model# SP333 QwikBUS™ Intelligent Controller unit(s). All wiring to speaker/microphone shall be low-voltage Class II wiring, installed as per all federal, state, and local electrical and building codes.

Speaker/microphone unit(s) shall be designed to mount directly behind the faceplate in various models of the Alpha Communications® AlphaEntry™ touchscreen style and/or pushbutton style lobby/door entry stations.

Speaker/microphone unit(s) shall feature a built-in door release relay, voice volume control potentiometer and a plug-in connector for connection to the model# E32 32 station 2-wire extender(s), as needed (maximum 3 per system).

The TTE33-3 shall be able to accommodate up to 119 QwikBUS™ stations for each TTE33-3 mounted into the entry panel, when used with pushbutton type AlphaEntry™ door entry panels.

Contractor shall observe all local and national electrical and building codes.

TTE33-3 AlphaEntry™/QwikBUS™ Panel Speaker/Microphone Unit

The Alpha Communications® / S.T.R.™ TTE33-3 QwikBUS™ Panel Speaker/Microphone units are used with the AlphaEntry™ / QwikBUS™ type systems to provide intercom functions at remote door entry locations, and depending on system configuration, optional electric door opener(s) etc.

The TTE33-3 powers from the associated model# SP333 QwikBUS™ Intelligent Controller unit(s), and does not require any additional power supply unit(s).

The TTE33-3 speaker/microphones are designed to easily mount right behind the faceplate in various models of our AlphaEntry™ touchscreen style and/or pushbutton style door entry stations.

The TTE33-3 speaker/microphones also feature a built-in voice volume control potentiometer and a plug-in connector for connection to the model# E32 32 station 2-wire extender(s).

The PC boards are treated with a special chemical finish, to minimize the affects of weather and moisture on the electronic components.

Features

- Easily Installs Right Behind AlphaEntry™ Lobby Entry Panel
- Operates on Safe Low-Voltage Class II Wiring
- Clear Voice Fidelity with Adjustable Voice Volume Controls
- Convenient Screw Terminal Connections
- High quality Half-Duplex Voice Communications
