

T-7722VD Extra Features 2Plus Wall Handset (Golmar)

Architects' And Engineers' Specifications

The 2-Wire handset station(s) shall be Alpha Communications® / Golmar **T-7722VD** or approved equal.

Handset(s) shall be mounted (surface or desktop with optional **SOB-700** adapter).

Handset(s) shall feature electret condenser microphone for exceptional voice fidelity. Handsets that include carbon transmitter or other voice technologies shall not be acceptable.

Handset shall have a heavy-duty replaceable coil cord. Handset shall include a door release pushbutton and auxiliary pushbutton. Handset(s) shall include a built-in electronic call tone signal. Handset(s) shall require only two (2) common (loop) wires for system operation.

Contractor shall observe all local and national electrical and building codes.

T-7722VD Series Handsets

The Alpha Communications® / Golmar **T-7722VD** Series handsets are designed to work as an apartment type handset intercom station, using a minimal of wiring. All **T-7722VD** handsets in a building can be wired typically on only two (2) common (loop) wires!

These attractive handsets easily surface mount right on the wall. Handsets can be changed to desk mount with the addition of a model **SOB-700** desk adapter, or can be used with the addition of a model **MAC-500** plastic adapter trim plate.

All **T-7722VD** series handsets feature electronic tone signaling, heavy duty replaceable coiled cord and (2) two momentary button switches. These switches can be used for door release, or other signalling functions, depending upon system configuration.

Features

- Crystal Clear Half-Duplex Voice Operation
- Polished ABS RAL9003 White Plastic
- Microprocessor circuitry with eeprom memory
- Easy Installation - Only 2 Common (loop) Wires Required
- Privacy on audio and door open functions
