

BACKUP CAMERA SYSTEM FOR DODGE PROMASTER VANS RVS-918718

REAR VIEW
SAFETY
A Safe Fleet Brand

This Backup Camera System comes specific for the Dodge Promaster vehicles with a camera that fits in the third brake light on the Promaster vans and a mirror mounted monitor with a mounting bracket specific for Dodge vehicles.

The G-Series monitor replaces the existing rear view mirror for a clean look. Its screen is 4.3 inches wide and pushed to the left of the mirror to be more easily viewed by the driver. For an absolute perfect backing up experience, this monitor comes with adjustable grid lines, allowing you to adjust the grid lines to be completely accurate. The camera sits right underneath the third brake light and with its 580 TV lines and 170° viewing angle, provides an incredible view behind the vehicle. The system comes complete with all mounts and cabling needed for installation and a one year warranty.

Works on Promaster models from 2014 and up.
