

Jeep Wrangler Backup Camera Kit 07-17

RVS-T16

Finally, a backup camera specifically for the Jeep Wrangler. The RVS-T16 is designed for vehicles with an aftermarket display, such as an aftermarket navigation radio or other display monitor. It includes a composite (RCA) connection to the video input on the monitor. It also includes an optional RCA jumper harness to connect to vehicles with the factory display radio. Please note that to use this method of connection to the factory display radio, dealer activation is required.

Simply install this high mount camera system behind your spare tire. The innovative bracket system allows the camera to swivel up/down and left/right. With an 170° viewing angle, this backup camera gives you a panoramic view of your surroundings. With an IP67 rating, this camera works perfectly in harsh weather conditions. The RVS-T16 has a 720 x 480 resolution with over 600 TV lines, giving you the best quality picture available.

NOTE: This product features a high resolution Panasonic OEM camera that does NOT display distance grid lines.
