SAFETY
A Safe Fleet Brand

RVS-35WM

Perfection takes time, especially with something as complicated as wireless transmission. Our newest wireless monitor, part of our new SimpleSight™ Series was born from years of testing and multiple prototypes. This monitor can receive a 100' digital wireless signal which is guaranteed to work even at highway speeds. Users can pair this wireless monitor with our compatible wireless camera (RVS-50W) sold separately. **Note:** Make sure the antenna on the monitor is installed straight up, not to either side.
