dotworkz

Helping Recording Systems Stand Out in a Crowd

Dotworkz designed its specialized housings to blend in with any environment, but when public safety is of the upmost importance can be better for security systems to stand out, rather than blend in.

The Dotworkz Strobe Light Security System will call the appropriate amount of attention to live recording systems in outdoor and indoor environments.

The XENON Strobes are of the highest power and quality, and are compatible with all Dotworkz D2, D3, and S-type enclosures. Ideal for police stations, schools, or anywhere visual prominence is imperative.

KT-STBB: Dotworkz XENON Strobe Light Security Kit

- Long Life XENON Bulb
- Preserves Ingress Seal Rating on enclosure
- Outdoor power cables
- Available in Blue
- Polycarbonate Lens Material

Description:

When public safety is the highest priority security cameras need to be easily visible–both indoors and outdoors, and at any distance. Dotworkz has engineered a flashing strobe kit (KT-STBB) to assure that the proper attention is called to live recording systems when visual prominence is imperative. Available for both the D-Series and S-Type housings, the Dotworkz Strobe Light Security Kit uses the highest powered and longest lasting XENON bulbs available. The kit includes all parts needed to easily install the strobe light system with any deployment, including specialized power coated raiser bracket, cables, and light.
