Warning Before Installation

- Power off the Network Camera as soon as smoke or unusual odors are detected.

Contact your distributor in the event of occurrence.

- Refer to your user's manual for the operating temperature.

- Do not place the Network Camera on unsteady surfaces.

- Do not touch the Network Camera during a lightning storm.

- Do not insert sharp or tiny objects into the Network Camera.

- Do not drop the Network Camera.

1 Package Contents

● FD8361L

● Bottom Base

● Alignment Sticker / Ceiling Hole Template Sticker

● L-type Hex Key Wrench / RJ45 Female/Female Coupler / Silica Gel / Screws

● Quick Installation Guide / Warranty Card

● Software CD

2 Physical Description

Inner View

Operating environment: -20° ~ 50°C
 When the temperature inside the Network Camera reaches over 50°C, the fan will operate automatically; when the temperature inside the Network Camera drops to 0°C, the heater and fan will both operate automatically.

● Outer View

Record the MAC address under the camera base before installing the camera.

Holes to secure the bottom base.

3

Hardware Installation

First, use a screwdriver to loose the three screws and detach the dome cover from the camera base. Then, follow the steps below to install the camera to either a ceiling or a wall.

**Ceiling mount (with the bottom base)**

1. Attach the supplied alignment sticker to the ceiling.
2. Using the 10 circles on the sticker, drill at least 2 pilot holes symmetrically on each side into the ceiling. Then hammer the four supplied plastic anchors into the holes.
3. Through the four holes on the bottom base, insert the four supplied screws into the corresponding holes and secure the bottom base with a screwdriver.
4. Feed the cables through hole A or B. If you want to use hole B, remove the rubber stopper with a screwdriver.
5. Secure the camera base to the bottom base with three supplied screws.

Wall mount (with the bottom base)

1. Attach the supplied alignment sticker to the wall.
2. Using the 10 circles on the sticker, drill at least 2 pilot holes symmetrically on each side into the wall. Then hammer the four supplied plastic anchors into the holes.
3. Using the four holes on the bottom base, insert the four supplied screws to corresponding holes and secure the bottom base with a screwdriver.
4. Feed the cables through hole A or B. If you want to use hole B, remove the rubber stopper with a screwdriver.
5. Secure the camera base to the bottom base with three supplied screws.

Drop-ceiling mount (without the bottom base)

1. Attach the supplied ceiling hole template sticker to the ceiling.
2. Open a hole along the inner circle of the sticker.
3. Using the 3 circles on the sticker, drill 3 pilot holes into the ceiling. Then hammer the three supplied plastic anchors into the holes.
4. Mount the Network Camera to the ceiling and feed the cables through.
5. Using the three holes on the side of the camera base, insert the three supplied screws into the corresponding holes and secure them with a screwdriver.

4 Network Deployment

General Connection (without PoE)

1. Connect the power cable to the AC 24V terminal block.

2. Use the supplied RJ45 female/female coupler to connect the Network Camera to a switch.
Use a Category 5 Cross Cable when Network Camera is directly connected to PC.

Power over Ethernet (PoE)

● **When using a PoE-enabled switch**

The Network Camera is PoE-compliant, allowing transmission of power and data via a single Ethernet cable. Follow the below illustration to connect the Network Camera to a PoE-enabled switch via Ethernet cable.

● **When using a non-PoE switch**

Use a PoE power injector (optional) to connect between the Network Camera and a non-PoE switch.

5 Assigning an IP Address

1. Install "Installation Wizard 2" from the Software Utility directory on the software CD.
2. The program will conduct an analysis of your network environment. After your network is analyzed, please click on the "Next" button to continue the program.

3. The program will search for VIVOTEK Video Receivers, Video Servers, and Network Cameras on the same LAN.
4. After searching, the main installer window will pop up. Click on the MAC that matches the one labeled on the bottom of your device to connect to the Network Camera via Internet Explorer.

1. Access the Network Camera from the LAN.
2. Retrieve live video through web browser or recording software.

For further setup, please refer to the user's manual on the software CD.

7 Adjusting the Lens

Based on the live image retrieved from the camera, adjust the camera lens by doing the following:

To adjust the viewing angle -- 3-axis mechanism design

1. Loosen the pan adjustment screw and then turn the lens module left and right. Upon completion, tighten the screw.
2. Loosen the tilt adjustment screws on both side of the camera and then turn the lens module up and down. Upon completion, tighten the screws.
3. Loosen the rotation adjustment screw and then turn the lens to adjust the image orientation. Upon completion, tighten screw.

-  Rotate the screw
 Turn the lens

The sophisticated 3-axis mechanism design offers very flexible, easy hardware installation for either ceiling or wall mount.

Pan 350°

Tilt 60°

Rotate 350°

To adjust the zoom factor and focus range

1. Loosen the zoom controller to adjust the zoom factor. Upon completion, tighten the zoom controller.
2. Loosen the focus controller to adjust the focus range. Upon completion, tighten the focus controller.

DO NOT over rotate the lens. Doing so will damage the camera lens module.

8

Completion

1. Rotate the black cover inside the dome cover to fit the lens shooting direction.
2. Attach the dome cover to the camera.
3. Secure the three dome screws with the supplied screwdriver. Finally, make sure all parts of the camera are securely installed.
